ACT 10/15/018
Incandine

Energy West proposes to conduct a "helicopter assisted minor coal exploration surface drilling program" during the 2000 field season in T.16S., R.6E., Sec: 24 and T.16S., R.7E., Sec: 19. The project would consist of a row of 5 shallow core holes drilled in the Right Fork of Rilda Canyon to analyze potential access routes from PacifiCorp's existing Federal Coal lease U-06039 to the Mill Fork State Lease ML-48258. Two of the five holes would be completed within Federal Coal Lease U-06039 and the remaining three would be within unleased Federal coal located between Federal Coal Lease U-06039 and State Coal Lease ML-48258. Any distur-
bance would be properly reclaimed and seeded.

The Forest Service would authorize occupancy and use by Energy West Mining Company for exploration drilling which would provide information necessary to evaluate the geologic: stratigraphy, structure, hazards, and validate the geologic potential of the area's coal reserves.

Drilling for all holes is proposed to be helicopter supported, thus causing mineral surface impact. For this reason, it is anticipated that this action may be categorically excluded from further NEPA analysis (EA or EIS) under category 31.2(3), "Approval, modification, or continuation of minor special uses of National Forest System lands that require less than five contiguous acres of land".

Comments are invited on this proposal. To ensure consideration, comments should be sent to Will Wilson at the Manti-La Sal National Forest, Ferron Work Station (115 West Canyon Road, P.O. Box 310, Ferron, UT 84523) by **March 30, 2000**. To obtain further information about this project, contact Will Wilson at (435)384-2372. If you choose to participate, please make your comments as specific as possible. All received comments would be considered. Comments received in response to this solicitation, including names and addresses, would be considered part of the public record, and would be available for public inspection.
